ABOUT KARPI

More than 38 years ago, we started as a family business in Aalten, producing and selling rugs from leftover wall-to-wall carpet on a small scale. Since then, we have grown into a major global player with over 150 employees in branches in the Netherlands, India and China.

OWN PRODUCTION

Karpi Group has its own production facilities in the Netherlands, Belgium, Turkey, India and China. Annually, our factories produce a total of more than one million square meters of carpets. This is equivalent to 200 football fields! We have consciously chosen to produce in our own factories because this way we have control over the entire process and can use the most modern production techniques.

LOGISTICS

From our warehouse in Dinxperlo, located between the port of Rotterdam and the Ruhr region, we employ smart, innovative distribution processes to quickly serve our global clients. With a large stock of rugs ready for delivery, we consistently meet the demand of our partners.

ALWAYS ON-TREND

We work on new collections and production techniques throughout the entire year. We don't have fixed moments for launching collections. When we spot a trend, we respond to it immediately. This is possible thanks to our in-house production facilities and dedicated trendwatchers.

KARPI
GROUP

FAST AND AFFORDABLE

Through our own production channels, we are always able to quickly adapt and offer the best price. We even managed to supply a holiday park with 500 custom-shaped rugs that we had never made before, all within three weeks.

FAMILY BUSINESS

Carpetshavebeen inourDNAsince 1925. As a family business, multiple generations work side by side. Challenging at times, yet driving unmatched loyalty and dedication to both the company and the craft.

CARE for SUSTAINABILITY & CSR

As ourproduction grows,so does our responsibility for a sustainable future and corporate social responsibility. We ensure child labor-free manufacturing with our own facilities, create samples from leftover carpets, optimize transport, and have reduced packaging materials. More details can be found in our sustainability statement and production background.
